

WOW! Let me tell you about what is happening at Sunnyslope School! This is a special place with a deep history; a tight knit community where generations of families have attended school to learn, grow, and prepare for success in life, but something was missing. But now, our story is different-we are becoming so much more! We are creating our future. Sunnyslope students are the biggest winners. We are building 15 new classrooms at Sunnyslope School thanks to Measure M dollars and a brand new office building and staff work room. We are becoming an extraordinary learning community- a place where students, teachers, staff - everyone - can find opportunities to learn, grow, and thrive. If you are a student- we do what it takes to ensure that you have what you need to be successful. The Hollister School District has adopted a new ELA/ELD program and 90 percent of HSD teachers just finished 3 days of training to effectively implement this program. In this scenario, students and teachers win!

If you are an employee- this is the place to be for professional learning. Remember I just talked about the training? Well, teachers received two days of training for Capturing Kids Hearts in August, our new positive behavior support system and we created a District wide early release collaboration plan this past year to focus on improving math instruction for ALL students.

Our number one staff development focus is student engagement and achievement. Every day is an opportunity to move our students and school forward! At Sunnyslope School our goal is to provide our teachers with opportunities to be successful. What I am most excited about is that we at Sunnyslope School know our why: To help all students at Sunnyslope be high achievers!
